PROFESSIONAL SUMMARY

Motivated Frontend Developer with real-world internship experience at two companies, building responsive and scalable web applications using React.js, Redux, Node.js, and MongoDB. Certified in Artificial Intelligence (Slog Solutions) and Oracle Fusion AI Agent Studio (Oracle University), with a growing focus on integrating Generative AI — LLM APIs, AI-powered UI components, and intelligent chatbots — into production web products. Strong problem-solver passionate about crafting seamless user experiences enhanced by AI.

WORK EXPERIENCE

01/2026 – Present Dehradun	Software Web Developer, Anti Bikli Ventures Pvt. Ltd., Dehradun Jan 2026 – Present Working as a Software Web Developer in the IT Department, contributing to the design, development, and maintenance of web-based applications. • Collaborate with the reporting manager and cross-functional team members to deliver assigned tasks and meet project deliverables within timelines. • Handle company codebase, source code, and internal tools while adhering to organizational coding standards and confidentiality policies. • Support end-to-end development lifecycle including coding, testing, and deployment of web applications.
11/2025 – 01/2026 Dehradun	Full Stack Development Intern, SaiKet Systems • Selected for Full Stack Development internship; working on diverse projects involving web technologies, programming languages, and design principles. • Building user-friendly and visually appealing web interfaces, driving the company's online presence forward. • Exploring Generative AI integration into web workflows as part of modern development practices. Ref: SKS/A2/C65508
03/2025 – 10/2025 IT Park, Dehradun	Full Stack Developer Intern, Yourwebstore • Designed and developed dynamic web applications using HTML5, CSS3, JavaScript, React.js, Node.js, and Express.js. • Worked with MongoDB and MySQL for backend integration and RESTful API implementation. • Ensured application performance, scalability, and responsive UI/UX design across all deliverables. • Collaborated with design and development teams for efficient, on-time project delivery.

EDUCATION

2023 – 2026 Dehradun	B.Tech, Computer Science & Engineering, <i>Guru Ram Das Institute of Management & Technology</i> CGPA: 6.6 / 10

 CERTIFICATIONS & TRAINING

Oracle Fusion AI Agent Studio — Certified Foundations Associate

Issuer: Oracle University Date:
2025-10-25 Credential ID:
323308502OFAASOFA

Certificate of Training — Artificial Intelligence (4 Weeks)

Issuer: Slog Solutions Pvt. Ltd. (ISO
& MSME Certified) Date: 2024-06
Cert No: SLOG/GRD/STTRG052401

 FEATURED PROJECTS

07/2026 – 09/2026

[Real-Time Chatbot Application](#) | Node.js, Express.js, Meta (WhatsApp) API, Render

Developed a real-time chatbot application integrated with Meta's WhatsApp Business API to enable automated, two-way messaging between users and the system. Built a robust RESTful backend using Express.js (Node.js) to handle incoming webhook events, process user messages, and generate dynamic responses in real time. Implemented webhook verification and message-handling logic to ensure secure and reliable communication with the Meta Graph API. Designed the system architecture to support scalable message processing, reducing response latency and improving user experience. Deployed the application on Render, configuring environment variables, continuous deployment, and production-ready server settings for high availability. Handled error logging, API rate-limit management, and message queuing to ensure stable performance under real-world usage.

05/2026

[Food Expresso app](#)

React.js • Redux • Context API | JWT | OpenStreetMap Live GPS Tracker

- Built a responsive Food Delivery Web Application using React.js, Vite, Tailwind CSS, Node.js, Express.js, and MongoDB.
- Implemented JWT Authentication, Redux Toolkit Cart Management, and React Router DOM for secure authentication and seamless user experience.
- Integrated Razorpay Payment Gateway, Dynamic UPI QR Code, and OpenStreetMap Live Order Tracking with a mobile-first responsive UI.

01/2026

[Gemini AI Chat App](#)

React 18, Vite.js, Google Gemini API, Netlify

- Low-Latency AI Streaming: Integrated Gemini Flash API via @google/genai SDK for real-time conversational responses with automated auto-scroll (useRef/useEffect).
- Resilient API Architecture: Built robust exception pipelines handling HTTP 429 rate-limits, auth errors, and network fallbacks with shimmer/skeleton loading UX.
- Security & Deployment: Isolated API keys via .env configurations to ensure zero exposure and set up automated Netlify CI/CD deployment.
